

UK Certificate of Airworthiness Database

Some years ago, Air-Britain took custody from the CAA of the surviving original ledgers which had been used since 1919 to record the issues and renewals of Certificates of Airworthiness. These ledgers recorded all CofAs issued up to the mid-1950s, when the system was revamped. The subsequent internal records have not been traced.

The ledgers included all aircraft issued with CofAs, including British aircraft supplied overseas. Separate ledgers also included aircraft given Authorisation to Fly (mainly amateur-built), foreign aircraft given Certificates of Validation of their overseas CofA and also the limited number of civil aircraft operated during WWII on Ministry of Aircraft Production Permits.

All of the above ledgers have been summarised in the databases now published on the Air-Britain website.

Beyond 1950, we are also adding known CofA information on British-registered aircraft initially taken from the monthly ARB Registers published up to February 1963 and thereafter from the annual Bureau Veritas registers to which there were 10 monthly supplements providing this data. Thus far, we have extracted data from the BVs up to 1976 and this process is ongoing.

Up to 1950, Certificates of Registration and Certificates of Airworthiness operated their own separate numbering systems. Indeed, a new CofR number was issued on each change of ownership. From mid-1950 onwards, the numbering system was consolidated and thus CofR and CofA numbers were now identical and sequential ownership CofRs simply had slash followed by a suffixed number.

Any queries etc direct to me at m.fillmore@air-britain.com

CofA Authorisations to Fly

One year unless shown
