AUSTRALIAN REGISTER OF CIVIL AIRCRAFT

INTRODUCTION

This July, 1967, issue of the Australian Register of Civil Aircraft contains particulars of aircraft registered in Australia at 30th June, 1967 but is not a source of evidence of aircraft ownership.

The information contained in this publication is recorded on magnetic tape which permits the use of electronic computer techniques for the rapid extraction of specific information for Departmental purposes. The following notes explain the method used to present this information :-

- Column 1 - Registration Mark - This is always prefixed by the Australian Nationality Mark VH- which is omitted from the following pages.
- Column 2 - Type - Indicates the maker of the aircraft and the model number. The maker's name is abbreviated in most cases and a list of the abbreviations used appears in the following pages. These are normally self-explanatory and well-known in the aviation industry and for this reason the use of names such as "Tiger Moth", "Chipmunk" etc. have been discontinued.
- Column 3 - Serial No. - The number allocated to the airframe is quoted.
- Column 4 - Code - A group of nine figures which, by reference to the lists appearing on the following pages, details information on aircraft classification, aircraft manufacturer, aircraft type, engine classification, engine manufacturer and engine type.
- Column 5 - Air Navigation Category - Shows the class of operation in which the aircraft is operated :-
- | | |
|------------------|--------------------------------|
| 1. - Private | 3. - Charter |
| 2. - Aerial Work | 4. - Regular Public Transport. |
- Column 6 - Owner's Name and Address - The address of the currently registered owner is listed and, where available, a Post Office Box number has been preferred to a full postal address.
- Column 7 - Owner's State of Residence - The letter appearing in this column signifies the state of residence of the owner in accordance with the following :-
- | | |
|----------------------------------|--|
| C - Australian Capital Territory | S - South Australia/Northern Territory |
| N - New South Wales | T - Tasmania |
| P - Papua/New Guinea | V - Victoria |
| Q - Queensland | W - Western Australia |
- Column 8 - Base - This column indicates the location of the aircraft records and is mainly for the information of departmental officers.

Further issues of this Register will be produced at six monthly intervals and will be available from Departmental establishments in each Capital City.
