# AUSTRALIAN REGISTER OF CIVIL AIRCRAFT

# AUSTRALIAN REGISTER OF CIVIL AIRCRAFT

## INTRODUCTION

This publication contains information on aircraft entered on the Australian Register of Civil Aircraft at 30 June, 1969. Amongst other particulars it lists the name and address of the person or organisation in whose name an aircraft is registered but this should not be taken as evidence of aircraft ownership as the acceptance of an aircraft on the Australian Register does not confer title in any way.

The information shown in this publication is recorded on magnetic tape which permits the use of electronic computer techniques for the rapid extraction of specific data for Departmental purposes. The following notes explain the method used to present this information:-

- Column 1 - Registration Mark - This consists of a group of three letters prefixed by the Australian Nationality Mark of VH.
- Column 2 - Type - Indicates the manufacturer and aircraft type designation. The manufacturer's name is abbreviated in most cases and a list of the abbreviations used appears on the following pages.
- Column 3 - Serial Number - The number allocated by the manufacturer to the airframe is quoted.
- Column 4 - Code - A group of thirteen figures is normally used for computer sorting purposes but a code consisting of ten figures is shown in this publication as the 3 digit code indicating aircraft type designation is not required when this is already shown at Column 2. Reference to the following pages should be made for code information on aircraft classification, aircraft manufacturer, number of engines, classification of engines, engine manufacturer and engine type.
- Column 5 - A.N.C. - Shows the class of operation in which the aircraft is operated:-
- |                 |                              |
|-----------------|------------------------------|
| 1 - Private     | 3 - Charter                  |
| 2 - Aerial Work | 4 - Regular Public Transport |
- Column 6 - Owners Name - The name of the person or organisation to whom the aircraft is registered.
- Column 7 - Owner's Address - Indicates the address of the currently registered owner.
- Column 8 - State - The state or territory of residence of the owner is indicated by the following abbreviations:-
- |   |                        |
|---|------------------------|
| ACT - Australian Capital Territory      | QLD - Queensland       |
| NSW - New South Wales                   | SA - South Australia   |
| NT - Northern Territory                 | TAS - Tasmania         |
| PNG - Papua and Territory of New Guinea | VIC - Victoria         |
|   | WA - Western Australia |
- Column 9 - Base - This signifies the location of the aircraft records and is mainly for departmental use.

This publication is produced at six monthly intervals and may be purchased from departmental establishments in each Capital City.

AIRCRAFT MANUFACTURERS AND TYPES

LISTING REGISTRATION MARKINGS AND TOTALS FOR EACH TYPE ON THE AUSTRALIAN REGISTER AS AT 30-06-69.

THE NUMBER CODE SHOWN BESIDE EACH MANUFACTURERS NAME APPEARS AS THE SECOND, THIRD AND FOURTH DIGITS IN COLUMN FOUR OF THE LISTING OF AIRCRAFT IN ALPHABETICAL ORDER OF THEIR REGISTRATION MARKING IN THIS PUBLICATION. THE ABBREVIATIONS USED IN COLUMN TWO OF THAT LIST TO INDICATE THE AIRCRAFT MANUFACTURER ARE SHOWN HERE IN BRACKETS.

TOTAL NUMBER OF AIRCRAFT ON REGISTER AT 30-06-69. = 3559

CODE INFORMATION

At Column 4 of the listing of aircraft in alphabetical order of their registration marking there is a ten figure code which gives certain information regarding each aircraft. This code is made up as follows :-

<u>First Digit</u>	<u>Second, Third &amp; Fourth Digits</u>	<u>Fifth Digit</u>	<u>Sixth Digit</u>	<u>Seventh &amp; Eighth Digits</u>	<u>Ninth &amp; Tenth Digits</u>
Indicates classification of the aircraft as per the following:-	Indicates the manufacturer of the airframe.  (See Pages 2 - 30)	Indicates the number of engines as per the following:-	Indicates the classification of the engines as follows:-	Indicates the manufacturer of the engines  (See following pages for list of firms).	Indicates the type of model number or the engines.  (See following pages for list of types or models).
1 - Lighter than Air		0 - Nil	1 - Piston		
2 - Glider		1 - One	2 - Turbo-prop		
3 - (Reserved)		2 - Two	3 - Jet		
4 - Rotary Wing-Land		3 - Three			
5 - Rotary Wing-Amphibian		4 - Four			
6 - Reserved					
7 - Fixed Wing-Land					
8 - Fixed Wing-Amphibian					
9 - Fixed Wing-Sea
