- 115 untraced
- 116 untraced
It has been suggested that the above two were GAL.42 Cygnets supplied to South America but no evidence has been found to support this theory. In May 1940, it was announced that a specimen Cygnet was being shipped to Brazil and also to India. The former would be c/n 112, the latter is untraced [but possibly c/n 114 was allocated]. A large batch had allegedly been laid down at the time for export.

Regd [CofR 7162] 2.7.36 to Major Claud Ronald Anson, Crondall, Hants (based Hanworth). With The Master of Sempill, Anson departed for Australia 10.7.36 but encountered problems at Vienna; returned to Hanworth 11.7.36. Departed Hanworth/Croydon again 30.7.36, piloted by H Wood. Damaged on landing Jask; repaired and arrived Australia 9.36. Forced landed out of fuel on return flight Seringapatem Reef in Timor Sea, 462 ml W of Darwin, NT 7.10.36; crew/passengers rescued but aircraft abandoned. Regn cld 12.36 as wfu.
The ST-18 was announced by GAL in January 1935 as being built at Croydon and with orders for five placed by Oceanic Airways Ltd of Australasia, an associate of New England Airways. In May 1935, it was announced that the first ST-18 would fly in June/July 1935; it is not known what caused the delay until November.

Monospar Wings

For completeness, it should be noted that some "ST" types were allocated merely to wings fitted to other aircraft. These comprised:-

- ST-1 Monospar test section built for Air Ministry by Wm Beardmore in 1928 and displayed at Olympia Aero Exhibition in 1929.
- ST-2 Monospar 63 ft span wing built by Gloster Aircraft Ltd to Air Ministry order [dated 11.30] for £4,100 and fitted to Fokker F.VIIa/3m **J7986** c/n 4917. Ff 16.12.31. To AV Roe & Co Ltd, Woodford .32. Still being "refurbished" there early .33. To RAE Farnborough for tests 27.2.33. Still in use 4.34 and later soc. Probably for sale [3.35] by FB Barnard, Hornchurch. Fuselage was used [9.35] as a coffee stall on Canvey Island, Essex.
- ST-5 ST-4 type wing built by GAL at Croydon for Saunders-Roe Ltd and fitted to Spartan Clipper **S.5** c/n 201. Ff 14.12.32 by Col LA Strange. [Also flown at some time as **S-3**]. Regd **G-ACEG** [CofR 4210] 24.2.33 to Spartan Aircraft Ltd, East Cowes. CofA 3965 issued 29.6.33. Regd [CofR 7786] 24.3.37 to Saunders-Roe Ltd, East Cowes. CofA lapsed 16.4.42. Destroyed in air raid East Cowes 4.5.42. Regn cld 4.12.45 in census.
- ST-7 Monospar wing built by Saro and fitted to Saro A.19 Cloud **K2681** c/n A19/3 2.34 for research purposes and development of Saro A.33. To instructional airframe **1255M** 2.39.
- ST-8 Monospar wing built by GAL 8.33 to the order in Autumn 32 of the **Italian Government** and supplied to Aeroplani Caproni who had obtained a licence to manufacture the wing. After extensive static tests, it was fitted to the Caproni Ca.97Ri at Milan 1.34, which was later designated Ca.127 Monospar. The identity of the Caproni is uncertain, but it was one of MM.10497 to MM.10500, which were four prototype aircraft ordered on Contract 10745 dated 10.1.33. Of the four, two were powered by Alfa Romeo [Bristol] Jupiter XIIIs and one by an Alfa Romeo [Bristol] Mercury. The Monospar was fitted with an Isotta Fraschini XIIR.

Amongst **untraced GAL c/n's** may include:-

GAL.38 Fleet Shadower Aircraft **P1758** and **P1761** [latter not completed].

GAL.50 half-scale Hamilcar glider; initially flown as **T-0227** 8.9.41, towed by Hector, possibly to Heath Row. To Air Ministry as **DP226**. Returned to GAL.

AUSTRIA

It was reported in Aeropilot 12/35 that Prince Kinsky of Austrian Aero Club had bought a Jubilee Monospar ST-25 and that Mr Seth-Smith of GAL would soon be delivering it to Vienna with the owner. This report was corrected in the subsequent edition and proved to be G-ADIV on demonstration only.

FRANCE

In Feb 1933, it was announced that Sub Lt Hubert R de Mirbeck of 11me Esc. de Bombardment, Metz was planning a Paris-Tokyo-Paris flight in a Monospar. These plans were still current 3.33 but the intended aircraft is unidentified.

GREAT BRITAIN

An unidentified Monospar was operated by Air Commerce Ltd, Heston 3.35, fitted with underwing Neon tubes for advertising purposes. It was also fitted with 4-blade props.

An unidentified blue & silver ST-25 Universal was acquired by Amersham Grammar School c.41 as an instructional airframe; later crudely camouflaged and reportedly burned at end of war. (See drawing by John Young in his paintings book).

NETHERLANDS

Regn **PH-AZE** was reserved for a GAL.42 Cygnet II .40; nothing else known.

PORTUGAL

An unidentified ST-12 was delivered 8.36 to the Portuguese Navy in Angola [Missao Hidrografica de Angola] for aerial survey of hydrography of shoreline & rivers; [no serial issued]. It was transferred to the Quartier General du Mozambique [Lourenco Marques] '39 for use by Missao Hidrografica de Mocambique, where it took up the serial "**15**". It was transferred .43 to Army General HQ (Centro de Instrucao Aeronautico) in Mozambique and was wfu or written off in 1944. One prospect is that c/n 43 did not go to Spanish Republicans [which may account for the serial 31-2 also being quoted as a Caudron Goeland].

SPAIN

EC-AHE is an unidentified ST-25 ex **L8-5** regd 23.1.53 to Angel Garcia Delgado. [Probably one of c/n 77, 88 or 98]. Regd 8.2.56 to Jose Pinol Moncunil. Wfu 22.1.54. Regn cld 9.7.60. It is not ST-4 c/n 5 as has been reported.

Spanish Military:

A number of Monospars were operated during and after the Spanish Civil War. At least nine ST-25s were operated by Grupo 31 of Spanish Nationalists; later Ejercito del Aire (Spanish Air Force) with codes **31-2** to **31-10**; [31-1 was not apparently used]. 31-2 to 31-4 were used during Civil War, whilst 31-5 to 31-10 were issued 4.39 at end of war. The latter comprised 5 ST-25 Ambulances plus c/n 50. All surviving "31" codes were changed to "L8-" .48.

31-2 was c/n 43 [and was replaced by a Caudron Goeland with same code]. But see Portugal above

31-3 was c/n 39 but was reported to have been serialised **L8-2** and then reported as becoming EC-AHE (which was also reported as L8-5). It has also been suggested as c/n 53, but this seems unlikely.

31-4 [but possibly 31-6] was c/n 53.

Several ST-25s were still operated by Grupo 31 up to 6.47, including **31-5**.

TURKEY

TC-TK4 was an ST.25 Universal delivered [by 3.37] to Turk Hava Kurumu [Turkish Air League] for use in parachute training. It cannot therefore be c/n 97 [as commonly reported] nor seemingly c/n 80 [as sometimes reported]. It may well be c/n 88, if that did not go directly to Spain.

A Turk Hava Kurumu Monospar [reported as an ST-18] bought for aerial survey work crashed 22.10.37; 4 killed. It has been suggested that this is TK4 but it could equally be one of c/n 96 and 97.
