Models

3200 Prototype with 240hp Salmson 8AS-4 engine	c/n 01?
3201 Prototype with 170hp Regnier 4L-22 engine	c/n 1?
3202 Production of 50 with 240hp Potez 4D-32 engine	c/n 2 – 51?
3202B Production of 50 with 260hp Potez 4D-34 engine	c/n 52 – 101?
3202B1B Modified for aerobatic use by Patrouille de l'ALAT Larger ailerons, lower weight, new landing gear and variable pitch propellor	c/n 95, 99 & 101 at least
3212 Redesign of 3202 with radio compass and instrument flight training	?

Remarks

My starting point for this list is the excellent work undertaken by Christian Malcros, which only concerns itself with the ALAT service of the N3202.

[Nord 3202.pdf \(museehelico-alat.com\)](#)

I have added post ALAT service details as available on the internet

Years of manufacture are taken from the FAA, DGAC and CAA websites, ignoring rebuild dates often quoted, especially by the DGAC.

I have made no comment as to their veracity, which is for others to comment upon.

Neither have I taken in service dates quoted by Christian Malcros as evidence for the year of manufacture.

Confirmation is required regarding models and c/n tie-ups from the limited information seemingly available on the internet and civil registers.

Amendments and additions

[Any and all amendments are welcome to my usual e-mail address les_hitchings@hotmail.com](mailto:les_hitchings@hotmail.com)
