Date: 06-MAY-2012
Time: 12:35
Type: [3Xtrim 450](#)
Owner/operator: Private
Registration: SP-YPL
C/n / msn: E53
Fatalities: Fatalities: 2 / Occupants: 2
Other fatalities: 0
Aircraft damage: Written off (damaged beyond repair)
Location: Ružomberok airport LZRU -  [Slovakia](#)
Phase: Initial climb
Nature: Private
Departure airport: LZRU

Destination airport: ?

Narrative:

On 6 May 2012 the pilot of a 3Xtrim 450 took-off from the grass runway 24.

After the take-off the pilot started to turn left at an altitude of 15 m, flew over LZRU Tower at an altitude of 35 m and continued the flight at a course of 170°. Then the pilot started a sharp left turn to a course of 060°. At an altitude of 40-50 m above the ground level the aircraft sharply turned left and suddenly tilted over forward. The aircraft made a 1.5 turn counterclockwise, vertical to the ground, at full engine output and hit the ground.

About 5 sec after the impact the aircraft caught fire and started to burn.

Causes of air accident:

- the pilot did not pay sufficient attention to the meteorological situation,
- the pilot overrated the capabilities of the aircraft with exceeded maximum take-off weight,
- poor mastering of the flying technique after the take-off.

Other fatalities: 0

Aircraft damage: Substantial

Location: WarzACHEWKA Królewska -  [Poland](#)

Phase: En route

Nature: Private

Departure airport:

Destination airport:

Narrative:

The emergency landing of the 3xtrim 450 aircraft took place in the vicinity of the Warzȧchewski Królewskiej . At 300 meters the engine fell into a vibration. So the pilot fired a rescue system that did not open. As he approached the landing, he bumped up the bushes, so he had a damaged propeller and chassis.
